

INSIGHT 24

LEAD WITH CONFIDENCE & EMPOWER YOUR ENTERPRISE.

"The I24 module has automated our Daily Management Report generation and created tremendous efficiencies for our organization. Once you've been given a tool like I24, you can't imagine not having an all-encompassing reporting capability at your fingertips."

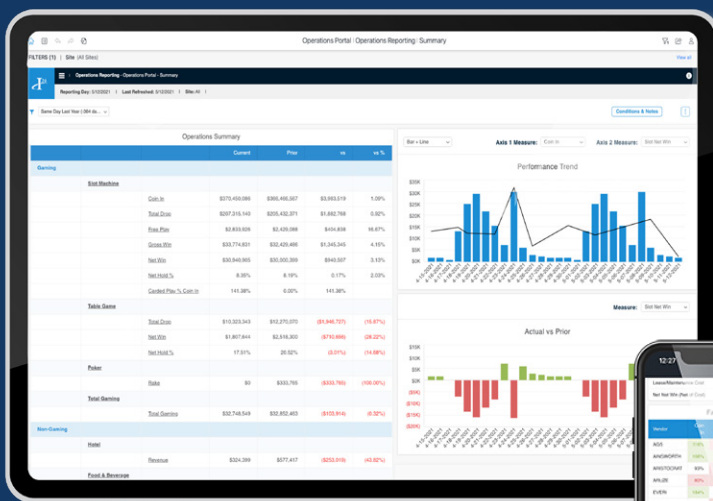

-Dawn McGrady, Director of Finance
Little River Casino Resort

WHY CHOOSE INSIGHT 24?

Insight 24 (I24) provides a suite of management and operational-level reporting to empower casinos with an accurate overview of their operations. Our user-friendly dashboards provide near real-time data on your daily operations, it's comparisons to historical performance and forecasted plans, and the details that compose the high-level results. I24 provides focus to the individual departments and their contributions to the bottom line by providing portals to analyze player trends, machine performance, and property financials.

KEY BENEFITS

- **VISIBILITY** - Provides end-to-end visibility into the entire operation and promotes data-driven business decisions.
- **REAL-TIME** - Reports are available in near real-time and updated throughout the day, providing fresh and accurate data.
- **CONNECTION** - Connects the operation by providing one source of truth in user-friendly format.
- **EVOLUTIONARY** - Evolves with your operation's growth or data needs and compliments all other systems in place.

I24 PLATFORM OVERVIEW

OPERATIONS

All source systems are connected and your Daily Operating reports are automated in our Operations Portal. Executive, high-level view across all operations with 7 stock KPI Horizon Comparisons for your data, providing an in-depth analysis of casino operations metrics in filterable, multi-dimensional views.

PERFORMANCE

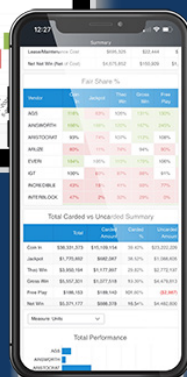

This portal is both a drill-through from the Operations Portal and stand-alone dashboard, built with the same time horizons and focus on strategic decision support. Whether you are assessing floor performance at a high level or using click-through navigation to drill down to a single machine, connecting all levels of management to critical information has never been so simple.

PLAY

Similar to the Performance reports, all reports can be accessed through the drill-down feature from the Operations Portal. View your player database by deciles or other segments, easily compare play between different time periods, and see entire player history in as little as a few clicks.
